Professional Summary

Web Developer with hands-on experience at Dasinfomedia, specializing in WordPress website development, PHP Laravel applications, and AI Automation solutions. Proficient in HTML, CSS, JavaScript, jQuery, AJAX, PHP, Laravel, MySQL, and modern development tools, with a strong focus on building responsive, scalable web applications and solving real-world business problems across full-stack development.

Experience

Dasinfomedia
Web Developer

23 Feb 2026 – Present
Ahmedabad, Gujarat

- Designed and developed a fully responsive **Glass & Mirror business website** (live site) using WordPress covering UI layout, theme customization, SEO optimization, and production deployment.
- Built and published **custom WordPress plugins** to extend site functionality, integrating business-specific features without relying on third-party solutions.
- Developed and deployed **AI Automation workflows** using modern automation tools to eliminate repetitive business processes, significantly reducing manual workload and improving operational efficiency.
- Engineered **PHP & Laravel** backend applications with structured MVC architecture, REST API integration, MySQL database design, and clean query optimization for production-grade performance.
